

QA & CHANGE REPORT — MEDIA & MUSIC COMBINED (0526)

TMHCC Wording Update QA / Change Report

Round 7 — final wording update and refresh of all supporting market documents.
Explains exactly what changed, where, and what still needs underwriting/legal sign-off.

Wordings reviewed

- Benchmarked against five competitor wordings:
- Tysers (Zurich), Yutree (AXA), Liberty, Allianz and AXA XL (XL Catlin).

Companion to: final wording (tracked + clean), Full Coverage Comparison, Gap-Fill / Wording Enhancement Strategy and Summary of Cover.

All wording edits shown as fresh tracked changes from a clean accepted baseline. Section 12 items are held for sign-off and are NOT in the wording.

1 Files produced

- TMHCC_Media_Combined_0526_FINAL_TrackedChanges.docx — final wording, NEW edits as tracked changes (from a clean accepted baseline).
- TMHCC_Media_Combined_0526_FINAL_Clean.docx — final wording, clean (new tracked changes accepted).
- TMHCC_Media_Coverage_Comparison_FULLL.docx — updated Full Coverage Comparison (deepened strengths).
- TMHCC_Media_GapFill_Enhancement_Strategy.docx — updated Gap-Fill / Wording Enhancement Strategy (copy-paste wording for every recommendation; Section 12 sign-off list; market-leading opportunities).
- TMHCC_Media_Combined_Summary_of_Cover_FINAL.docx — updated Summary of Cover (final wording only).
- TMHCC_Media_Combined_QA_Report.docx — this report.

Branding / layout: Branding, layout, fonts, headers, footers, numbering and styling are preserved. No section numbering changed, so the contents-page hyperlinks still resolve; the Section 15 contents label was updated as display text only (anchor unchanged).

2 Document handling

changes	YES — the uploaded wording contained one residual run-property change (w:rPrChange) and no insertions/deletions; it was accepted to form and saved internally.
changes for new	YES — all new amendments applied as new tracked changes (author 'TMHCC Wording Review') on the accepted baseline: 9 insertions, 2 deletions.
clean copy produced	YES — a clean copy with the new tracked changes accepted is also delivered.
changes carried	NO.

3 Change log — wording (tracked)

Task 1 — Admission of Liability (claims condition precedent removed/softened)

	Policy Claims Conditions (Applicable to Sections 1–11) → sub-heading 'Admission of Liability' (contents p.17).
eted)	'It is a condition precedent to liability under this Policy that no admission of liability, promise, payment, compensation, negotiation or settlement shall be made or given without the Insurer's written consent.'
erted)	'The Insured shall not, without the Insurer's written consent, make any admission of liability, promise, payment, compensation, offer, negotiation of any claim. The Insurer shall not be entitled to rely on any breach of this condition to reduce or refuse a claim except to the extent that the Insured has been prejudiced by the breach.'
	Converts a blanket condition precedent into an ordinary condition with a prejudice qualifier — aligns with the competitor market. No other cover

Task 1 — policy-wide claims condition-precedent audit

The whole document was audited. Result:

Clause	Location	Type	Decision
Admission of Liability	Policy Claims Conditions (S1–11)	Blanket claims CP	Replaced (Task 1)
Notification of a Claim (S1–11)	Policy Claims Conditions (S1–11)	General claims notification	NOT a CP ('will notify... as soon as practicable') — left as-is
Notification to the Police	Policy Claims Conditions (S1–11)	Theft/loss reporting CP	Retained (scope-limit)
Claim/Circumstance Notification (S13)	Notification & Claims Conditions — S13	Section-level notification CP	Retained (section-level)
Notification of Claims (S12)	Section 12 claims conditions	Section-level notification CP	Retained (section-level; S12 sign-off)
Notice provisions (S14)	Section 14	Section-level notification CP	Retained (section-level)
Cooperation / excess (S15)	Section 15 (CyberGuard)	Section-level conditions	Retained (section-level)
Data storage / back-up (S1)	Section 1 IT property condition	Risk-improvement CP	Retained (scope-limit)
Unattended-vehicle / security / hire	Sections 1–2 / Money	Security / risk conditions	Retained (scope-limit)
Rushes / originals / negatives storage	Section 11	Storage CPs	Retained (scope-limit)
Hazardous-activity risk assessment	Section claims conditions	Risk-improvement CP	Retained (scope-limit)
Audit conclusion: No remaining GENERAL / policy-wide claims-notification or claims-cooperation requirement is described as a condition precedent. The section-level notification CPs and the security/storage/risk-improvement CPs are normal and were left intact per the scope limit.			

Task 2 — Proof of Ownership and Value (new claims requirement)

	Policy Claims Conditions (Applicable to Sections 1–11), as a new headed claims condition placed (alphabetically) between 'Notification to the Insurer' and 'Terms of Settlement' (contents p.17).
	Sections 1–11 (spans Property & Equipment, Goods in Transit and Money). Item-level — not a blanket condition precedent or forfeiture.
	'Following any claim for theft or loss, the Insurer may request reasonable evidence of ownership and value in respect of any high value item or part of a claim, for an affected item where the Insured fails to provide the evidence reasonably requested.'
reference	References items insured on an 'Agreed Value' basis (Section 2 uses an Agreed Value Basis of Settlement). No new Schedule definition required. 'item' is left to the Schedule/sub-limits.

Task 4 — Gap 8 (ICOW / Book Debts) implemented

	Section 3 (Business Interruption) — Definitions and Basis of Settlement, 'Accounts Receivable' head (contents p.38).
	'Accounts Receivable' re-labelled 'Accounts Receivable (Book Debts)' in both the Definitions and the Basis of Settlement (tracked insertion).
	Increase in Cost of Working and Additional Increase in Cost of Working are ALREADY named, discrete settlement heads; book-debts cover a subset of 'Accounts Receivable'. The only refinement needed was presentational labelling for like-for-like comparison with Allianz/AXA XL. No cover breakdown

Task 11 — Section 15 title standardised

	'Section 15 - CyberGuard™' → 'Section 15 - CyberGuard™ (Cyber Liability)' (tracked insertion).
	'Section 15: Cyber Liability Section' → 'Section 15: CyberGuard™ (Cyber Liability)' (tracked; hyperlink anchor unchanged).
er	Updated to 'CyberGuard™ (Cyber Liability)' (table + section header).

	Left as 'Production Indemnity "All Risks"' — already consistent.
	Default label 'CyberGuard™ (Cyber Liability)' adopted. SEE REVIEWER NOTES — confirm preferred label.

4 Gap 2 / 8 / 10 — final positions

Gap 2 — Worldwide / WW Media Liability (Section 12 — sign-off)

Current wording: Section 12 territory is bounded by the Schedule 'Geographical Limits' and the 'Jurisdiction' definition (default = worldwide EXCLUDING the USA and Canada where the Schedule is silent); the 'Legal Action' exclusion bars claims brought, or governed by laws, outside the Jurisdiction. There is no single clean Schedule-selectable 'Worldwide (incl. USA/Canada)' switch. A drafted optional 'Worldwide Territory and Jurisdiction (Optional)' provision plus a separate 'USA/Canada Jurisdiction' selectable is held in the Section 12 sign-off list (Gap-Fill Summary). NOT applied to the wording — ALL Section 12 changes require legal/underwriting sign-off.

Gap 8 — ICOW / Book Debts (implemented)

Already substantially met: ICOW and AICOW are named settlement heads in Section 3 and book-debts cover exists as 'Accounts Receivable'. Implemented as a presentational label '(Book Debts)' (tracked). No broadening; no sign-off.

Gap 10 — Breakdown / Yutree position

Section 1 (Premises) DEFINES 'Breakdown' and covers/pays Information Technology Property 'Breakdown' (definition, 'The Cover', Basis of Settlement) — the old Section 4 IT-Property breakdown, preserved faithfully; this matches Yutree's dedicated Computer Breakdown section. Section 2 carries a 'Mechanical and Electrical Breakdown' OPTIONAL EXTENSION with its own broad Breakdown definition covering ALL Property Insured — this mirrors Yutree's general 'Mechanical and electrical breakdown cover'. No wording change made (no general breakdown added to Section 2; nothing removed). SEE REVIEWER NOTES.

5 Items requiring legal / underwriting sign-off

- Gap 2 — Worldwide Territory & Jurisdiction (Optional) and the separate USA/Canada selectable (Section 12).
- Section 12 enhancements held in the sign-off list: Distributors & Purchasers; Criminal/Regulatory defence costs (or S13/S14 cross-reference); Journalistic Source Protection costs; Representation Costs at Investigations (GBP 25k); Asbestos/Pollution professional-duty write-back (negligent advice only); King's Counsel determination clause; 'Media Material' definition; Reputation Management / Withdrawal of Content optional uplift.
- Any decision to narrow the Section 2 Mechanical & Electrical Breakdown optional extension to IT-only (would remove existing cover and make TMHCC narrower than Yutree).
- Any decision to add a Personal Accident & Business Travel section (NOT added in this round).
- Confirmation of the Section 15 label.

Section 12 control: No Section 12 change appears in the tracked-changes wording or the clean final wording. They are presented only as suggested upgrades with copy-paste wording, exact location, amendment type, rationale/competitor support and a sign-off note in the Gap-Fill Summary.

6 TMHCC strengths added to the comparison (and UNCONFIRMED items)

Six strength areas were expanded and evidenced against the final wording, each with our clause/page and a competitor benchmark: (1) Flexible first-loss Business Interruption; (2) Contract Site extension (Section 3); (3) Section 2 worldwide Property & Equipment; (4) floating contents across premises; (5) higher limits / broader extensions; (6) US / USA-Canada / jurisdiction.

Competitor wordings ARE attached (Tysers, Yutree, Liberty, Allianz, AXA XL), so 'market-leading' claims are evidence-based rather than blanket-UNCONFIRMED. Where a specific competitor figure could not be re-confirmed clause-by-clause from the extract, it is labelled UNCONFIRMED in the comparison: competitor BI flexibility/parity, contract-site/supplier extensions, location-basis (floating contents) and competitor transit day-limits. CONFIRMED from extracts: TMHCC virus-transmission sub-limit GBP 500k vs Tysers GBP 250k; Liberty/Allianz/AXA XL carry no media/PI/cyber/legal/management cover.

7 Final QA checklist

Check	Status
Changes accepted before new edits	YES
As fresh tracked changes	YES (9 ins / 2 d
Produced	YES
Off-Liability CP removed/replaced	YES
Wide claims CPs audited; section-level/security CPs intact	YES
No claims requirement added	YES (Sections 1

Hyperlinks & section numbering still resolve	YES (numbering unc
Comments in Reviewer Notes	YES

8 Reviewer notes (uncertain / for confirmation)

- Section 15 label: default adopted is 'CyberGuard™ (Cyber Liability)'. Confirm this is the preferred single label for the body heading, contents and Summary of Cover.
- Gap 10 location: the brief states the IT-Property breakdown sits 'under Section 2'. In the live wording the IT-Property 'Breakdown' definition and cover are in SECTION 1 (Premises), with consequential computer cover in Section 3 (BI). Section 2 holds only a general 'Mechanical and Electrical Breakdown' optional extension. Confirm this is understood and acceptable.
- Gap 10 / Section 2: the existing Section 2 Mechanical & Electrical Breakdown optional extension covers ALL Property Insured (not IT-only) and mirrors Yutree's general M&E breakdown cover. Narrowing it to 'IT-only' would remove existing optional cover and make TMHCC narrower than Yutree — NOT done. Confirm whether any narrowing is actually wanted (would require sign-off).
- All Section 12 amendments (incl. Gap 2 worldwide and the reputation-management uplift) are suggestions held for legal/underwriting sign-off — none is final or in the wording.
- Competitor parity statements labelled UNCONFIRMED should be re-checked clause-by-clause against the live competitor wordings before being used externally.
- Proof of Ownership: 'high value item' is intentionally left to the Schedule/sub-limits rather than given a fixed monetary threshold — confirm whether a defined threshold is preferred.
- PDF copies: generated where the document-conversion toolchain (LibreOffice) is available in the environment; otherwise the .docx files are the authoritative deliverables.

End of QA / Change Report.
