

FINAL QA REPORT

Final QA Report

Quality assurance for the full-redline reset, six-insurer legal review and PolicyBridge blueprint

Wordings reviewed

- TMHCC 0223C · TMHCC final (58b8340) · Tysers · Yutree · Liberty · Allianz · AXA XL · Entertainment Elite

Baseline: TMHCC 0223C. Final wording: TMHCC Media & Music Combined (commit 58b8340).

All completed outputs are saved in separate phase folders so no failed phase corrupts completed work.

Every enhancement remains subject to TMHCC underwriting/legal sign-off.

10	Final_QA_Report.docx (this document)	docx + PDF

2. Full 0223C→final redline generated from scratch

CONFIRMED — The redline was generated afresh by diffing the actual paragraph text of OLD_0223C.docx (2713 paragraphs) against the final clean wording (3805 paragraphs) using a sequence + word-level diff, emitting genuine Word tracked changes (2067 insertions incl. 28 UW-tagged, 973 deletions, 118 inline amendments). Verified at the XML level (2,161 w:ins, 1,105 w:del) and by rendering.

3. Existing tracked changes NOT relied on as the sole redline

CONFIRMED — The prior TrackedChanges document (recent enhancements on a clean 0526 baseline) was explicitly NOT used. The redline was built directly from the 0223C baseline and the final wording.

4. UW enhancements remain separately identifiable and unaccepted

CONFIRMED — The 14 rounds 7–9 enhancements are tagged in the redline under a distinct tracked-change author ('UW Review Enhancement'), yellow-highlighted and annotated '[UW REVIEW ENHANCEMENT — awaiting underwriting/legal sign-off; not accepted]'. They remain tracked (unaccepted) and are catalogued in the UW Enhancement Register.

5. Abuse / Tysers issue reviewed

CONFIRMED — A dedicated Abuse / Safeguarding / Molestation section was produced (Phase 03 Section A) grounded in the wordings: TMHCC PL EXCLUDES abuse; Yutree and AXA XL also exclude; Tysers, Liberty, Allianz and Entertainment Elite contain NO express abuse exclusion (silent). TMHCC is therefore narrower than those four — the issue the prior review missed. A caveat (silence ≠ confirmed cover) is logged, and an optional sub-limited abuse write-back with safeguarding conditions precedent is proposed (Phase 05).

6. Key findings — refreshed six-insurer legal review

- TMHCC is the broadest wording by section count and the ONLY one offering Loss of Licence, Commercial Legal Expenses, Management Liability and a standalone Cyber-liability section.
- Abuse: TMHCC/Yutree/AXA XL exclude; Tysers/Liberty/Allianz/Entertainment Elite silent → TMHCC narrower on abuse (headline miss now captured).
- Tysers PI is worldwide and covers patents; TMHCC S12 is jurisdiction-limited (default ex-US/Canada) and excludes patents.
- Statutory/criminal defence: Tysers GBP 1m; Yutree GBP 250k; TMHCC S12 funds only data-protection defence (broader criminal cover in S13/S14).
- AXA XL excludes terrorism and punitive/fines absolutely and carries broad cyber + communicable-disease exclusions — disciplined restrictions are market-normal.
- Personal Accident: Tysers (extensive) + Yutree (assault) provide it; TMHCC and three others do not.

7. Key TMHCC strengths (wording-supported)

- Widest section count; four sections no competitor offers.
- Genuine standalone cyber LIABILITY cover (not a bare exclusion as in AXA XL).
- Broad, well-extended Media Liability (S12) with employee-dishonesty write-back, data-protection defence, reputation/withdrawal, IP-pursuit and M&A auto-acquisition.
- Clean exclusion architecture (cyber/date exclusion dis-applied to S12–15).
- Favourable fines/penalties carve-back (vs AXA XL absolute exclusion).
- Sub-limits meet or exceed every evidenced competitor figure (e.g. Virus GBP 500k > Tysers GBP 250k).

8. Key TMHCC weaknesses / gaps

- Abuse exclusion (vs four silent competitors) — see Phase 03/05.
- Jurisdiction default ex-US/Canada (vs Tysers worldwide PI) — optional write-back drafted.
- Patents excluded (vs Tysers) — deliberate, defensible; no action recommended.
- No Personal Accident & Business Travel section — whole-section gap (parked proposal).
- S12-only criminal/regulatory defence looks narrow on a section-by-section read — cross-reference + contribution drafted.

9. High-priority gap-fill recommendations

- Abuse / molestation optional sub-limited write-back (HIGH; parked, proposed wording).
- Worldwide / USA-Canada territory option for Media Liability (HIGH; implemented as tracked change, awaiting sign-off).
- Personal Accident & Business Travel section (HIGH; parked, skeleton wording).
- Criminal/regulatory defence cross-reference + contribution (Medium-High; implemented, awaiting sign-off).

10. Coverage-comparison layout fixes made

CONFIRMED — The matrix was rebuilt as a clean, market-ready ONE-PAGE at-a-glance matrix (18 concise coverage features × 7 insurers + key-note column) with legend, footnotes and ✓/●/✗/? symbols; granular detail moved to a structured appendix. Verified by rendering: the main matrix fits on a single page with no overflow, and the appendix begins on the next page. The abuse row was added (the prior matrix's omission).

11. PolicyBridge workflow playbook created

CONFIRMED — Phase 06 produced the PolicyBridge Wording Studio Workflow Playbook — an 8-stage product specification with an app-interface specification and a worked example from this project.

12. PolicyBridge audit/rebuild prompt created

CONFIRMED — Phase 07 produced a ready-to-paste audit/rebuild prompt (discovery-first; no destructive changes; ten audit checks; product standard; the seven TMHCC documents as a test project), with the current-state finding that the app is presently a Document Centre, not a Wording Studio.

13. Items needing underwriting / legal sign-off

- All 14 UW enhancements in the register (S12 extensions, money restructure, S13/S12 definition changes, proof of ownership, admission of liability).
- Abuse write-back (claims + legal + reinsurance) and Personal Accident section (capacity/appetite).
- Worldwide/US-Canada option (reinsurance treaty territory) before any US/Canada offering.
- Confirmation that IT-property/breakdown cover is not narrowed by consolidation into S1/S2.
- Confirmation of the status (ordinary condition vs condition precedent) of the Proof of Ownership condition.

14. Limitations / points not verified

- Policy Schedules (limits, excesses, sub-limit figures, section toggles) were not supplied; section availability and sub-limits reflect the wording booklets only.
- Competitor schedules/endorsements were not supplied; a competitor's 'silence' on a peril (e.g. abuse) means no express clause was located, not a confirmed grant of cover — flagged for legal confirmation.
- The redline is a text-level legal-effect redline rendered with branding (opens in Word with Track Changes); the fully-formatted 126-page branded final wording is provided separately as TMHCC_Final_Clean.docx.
- LibreOffice PDF export renders tracked insertions as underline (black); Microsoft Word shows the two tracked-change authors in distinct colours. Highlight + annotation make UW items unmistakable in any viewer.
- The repository HEAD is a few auto-commits ahead of 58b8340; the working-tree final clean wording is treated as the 58b8340 final.

Completion statement

Complete: The final tracked-changes wording shows ALL changes from 0223C; UW enhancements remain separately identifiable and unaccepted; the six-insurer comparison has been materially re-reviewed; the abuse/Tysers issue (and other previously-missed points) has been specifically addressed; the coverage-comparison layout has been cleaned; the gap-fill strategy includes copy-paste wording and exact locations; and the PolicyBridge workflow playbook and audit/rebuild prompt have been produced. All completed outputs are saved separately by phase.
